

PRODUCT SHEET

Lasal Dental Cushions

Feel comfortable at the dentist.

Dental Cushions are designed to ensure a comfortable base in the dental chair during treatment for patients with different needs and challenges.

For use in dental clinics.

- Easy to adjust to patient and chair.
- Washable covers in different materials.
- Cushions for support of the head, neck, arms, legs, upper back, and lower back.
- Developed in cooperation with The Mun-H Centre in Odontology in Gothenburg, Sweden.
- Can minimize involuntary movements and tensity for the patient.
- 12 cushions in different shapes and sizes.

Use

For patients with physical and mental challenges being seated or put down in a dental chair can cause discomfort, anxiety, or restlessness. That is why Cobi Rehab has developed a dental cushion series.

Lasal Dental Cushions can be used alone or in combination to maximize the feeling of support, comfort and safety when visiting the dentist.

Dental fear can also be a reason for using Lasal Dental Cushion.

Regardless of the underlying reason, the aim is to avoid an uncomfortable position that may affect the muscle tension in an undesired way and thus complicating dental treatment.

U-Shaped Neck Cushions with hygiene cover.

Construction Dental Cushions

Lasal Dental Cushions are available in multiple shapes and sizes. The combination of small beads of polystyrene in a smooth inner cushion contributes to each cushion adjusting to the body shape as well as the dental chair.

Lasal Dental Cushions are mouldable and therefore more stable than ordinary cushions. There are four cushions supporting the area around the head, one cushion in two sizes supporting arms and four cushions supporting e.g., legs and lower legs.

All cushions can be purchased with removable and washable hygiene or jersey covers. To prolong the durability of the cushions, we always recommend using covers on the cushions.

Safe Guarder (adult) with hygiene cover, Leg Relaxer (adult) with hygiene cover, oblong with jersey cover.

Which cover to choose?

For the working area around head and upper body we recommend dental cushions with hygiene cover which are washable at high temperatures and easy to disinfect.

Cushions for seat, legs and feet can be used with both covers. The advantage of a jersey cover in this area is that the surface of the cover ensures that it does not slip on the surface of the dental chair.

Cleaning and maintenance

Wipe the cushions with a clean cloth wrung out in water with a mild detergent. The cushions must be completely dry before they are used again or put away.

Desinfection and wash

For surface disinfection of the cushions use disposable cloths with ethanol (e.g., Wet Wipe 70 %) or a chlorine product 1000-1200 ppm (e.g., Wet Wipe Chlorine Desinfection).

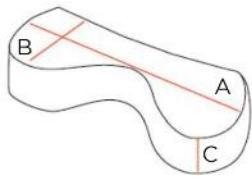

Safe Guarder (child) with hygiene cover, Crescent Cushion with hygiene cover, Seat Cushion (child) with jersey cover.

The hygiene cover is washable at 95° C and can be tumble dried. The jersey is washable at 60° C and can be tumble dried at low temperatures. Avoid rinse products with solvent.

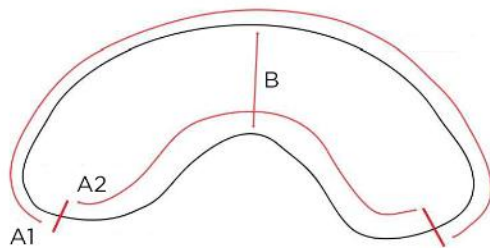

Lasal Dental Cushions without cover do not withstand machine washing but can be cleaned with a mild detergent or disinfected.

Lasal Dental Cushions

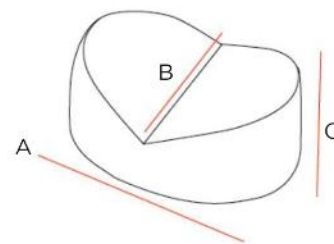

All cushions are measured from seam to seam. Remember to purchase cover.

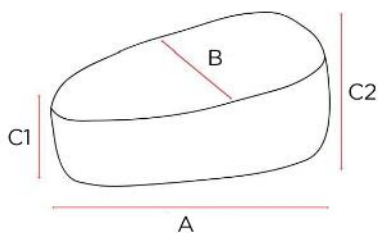

Neck Cushion: 0319-7001-000
 A Length 36 cm
 B Width 6.5 cm
