

Kamille Comfort wheelchair

A unique sensory-stimulating comfort wheelchair

- Asymmetric adjustment of back system and seat system
- Exceptionally flexible armrest
- Electrically adjustable back and electric tilt-in-space as standard
- Specially developed removable, padded body supports (additional)
- Swing away legrest as standard
- Crash tested according to ISO 7176-19.

1. Seat

Individual adaptation of the seat system for users with asymmetrical issues.

2. Armrest

Armrests which can be angled inwards, downwards, and upwards or adjusted in height.

3. Back

Individual adaptation of the back system for users with e.g., scoliosis or increased lateral flexion of the truncus.

CRASH TESTED
ISO 7176-19

Designed by
COBI REHAB

Supports contractures in both UE and LE without special adaptation

The Kamille Comfort Wheelchair provides exceptional support because its design is so flexible that it can support contractures in both upper extremities and lower extremities without special adaptation.

The potential to adapt optimally to the individual helps to increase activity level and quality of life.

The Kamille Comfort Wheelchair comes with an electrically adjustable back and electric tilt in space as standard.

The various electrical functions are continuously variable, which means the user will not experience any annoying lurches.

Electric tilt in space and back adjustment ensure better working conditions for the helper, who can avoid using their own body weight when handling the wheelchair.

The electric functions are activated with a remote control that can be operated by either the user or the helper.

Padded body supports (additional)

Specially developed body supports placed in slots on the back system contribute to near-

body trunk stability, regardless of whether the user has scoliosis or decreased/increased thoracic tone.

Multiple body supports can be placed on each side for more complex needs.

Cushion system

The Kamille Comfort Wheelchair is equipped with a complete and unique cushion system that ensures optimal pressure distribution and near-body positioning.

The cushions have been carefully designed to fit the body part that they support.

The cushions have been kept in a neutral tone because experience shows that dark colours can seem "bottomless" for users with impaired visual-cognitive function.

Designed in Denmark

Kamille Comfort Wheelchair has been developed by Danish physiotherapists and occupational therapists and product development engineers in collaboration with key persons from public institutions.

Kamille Comfort Wheelchair is produced in the EU and **crash tested according to ISO 7176-19**.

Specifications			
Max. user weight	140 kg	Weight of wheelchair	47 kg
Crash tested	Yes, according to ISO 7176-19	Solid wheels	12½", PU
Seat depth	400-560 mm	Frame	Steel and aluminium
Backrest angle	96° - 131°	Cushion filling (back, leg, foot)	Viscoelastic foam and polystyrene beads
Seat angle	0° - 45°	Cushion filling (seat)	Viscoelastic foam, cold foam, and polystyrene beads
Backrest height	500-525 mm	Push bar, adjustable	Yes
Height of backrest with backrest raiser	580-605 mm	Electrically adjustable back and electric tilt for the seat and back as standard	Yes
Seat width	340-520 mm	Swing away legrests	Yes
Max. width	695-815 mm	Kamille Comfort Wheelchair is also available in an electric propulsion version (Kamille Power Comfort Wheelchair).
